 - The root element
 - **html**

<html>

The <html> element represents the root of HTML and XHTML documents. Any subsequent elements are the children of this root element.

Authors are encouraged to specify a lang attribute on the root html element, giving the document's language.

HTML Attributes

- manifest = URL potentially surrounded by spaces
The address of the document's application cache manifest (which controls caching of content for offline use).

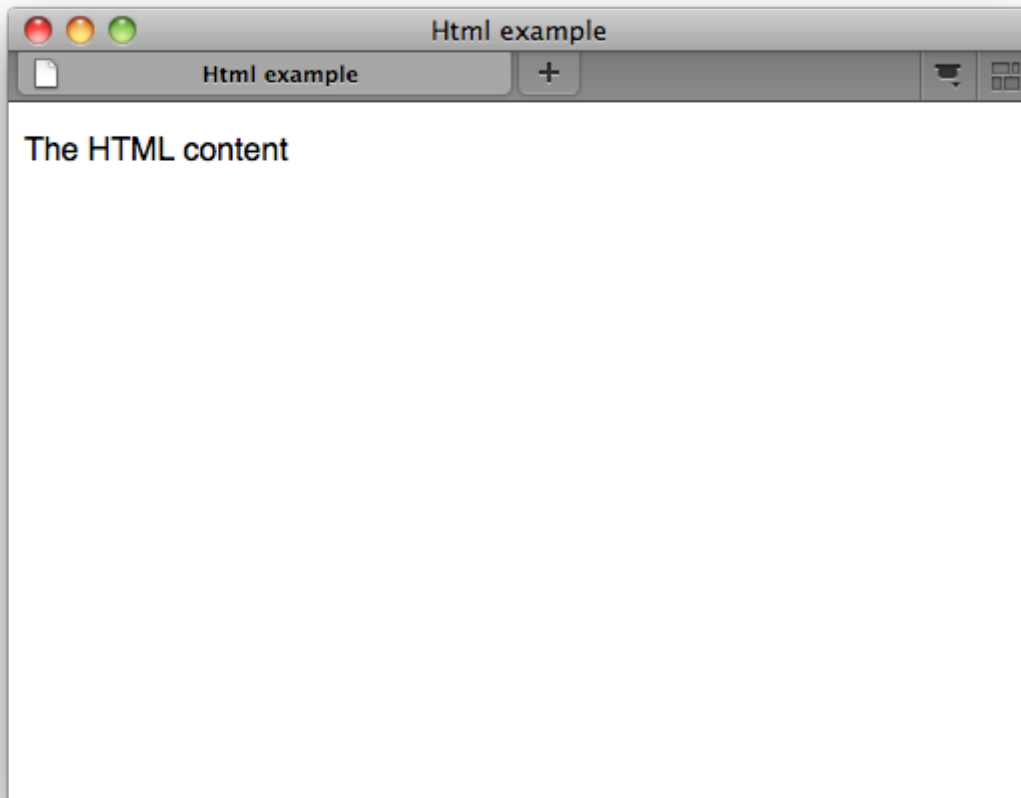

See also global attributes.

Examples

Example A

[try it (<http://test.w3.org/html/examples/elements/html/html01.html>)]

```
<!DOCTYPE html>
<html lang="en">
  <head>
    <meta charset="utf-8">
    <title>The HTML Document</title>
  </head>
  <body>
    <p>The HTML content</p>
  </body>
</html>
```

HTML Reference

The HTML5 specification defines the `<html>` element in 4.1.1 The html element (<http://www.w3.org/TR/html5/semantics.html#the-html-element>).
