

# HTML: The Markup Language (an HTML language reference)

[« img](#)[input type=text »](#)

## ① **input** – input control **CHANGED**

The **input** element is a multipurpose element for representing input controls.

The details of the **input** element are described in the following sections:

- ① [input type=text](#)
- ① [input type=password](#)
- ① [input type=checkbox](#)
- ① [input type=radio](#)
- ① [input type=button](#)
- ① [input type=submit](#)
- ① [input type=reset](#)
- ① [input type=file](#)
- ① [input type=hidden](#)
- ① [input type=image](#)
- ① [input type=datetime](#) **NEW**
- ① [input type=datetime-local](#) **NEW**
- ① [input type=date](#) **NEW**
- ① [input type=month](#) **NEW**
- ① [input type=time](#) **NEW**
- ① [input type=week](#) **NEW**
- ① [input type=number](#) **NEW**
- ① [input type=range](#) **NEW**
- ① [input type=email](#) **NEW**
- ① [input type=url](#) **NEW**
- ① [input type=search](#) **NEW**
- ① [input type=tel](#) **NEW**
- ① [input type=color](#) **NEW**

An **input** element with no **type** attribute specified represents the same thing as an [input element with its type attribute set to "text"](#).

## Changes in HTML5

Several new **input** element types have been added, and several new attributes are now allowed on the element.
